Task Description	Assigned to
Jack will finish the code for integrating the google translate api	Jack
Guarantee Website Accessibility Requirements	Trenton

## Minutes from Previous Meeting

In our previous meeting, we reviewed each team member's progress, discussing their completed work and any blockers they encountered. Since it was the first SCRUM meeting since the planning portion of the Sprint, members were still planning their execution. We then documented our discussion in the meeting notes and uploaded them to GitHub for reference. All team members were still working on their portion of the project, but they were ready to begin the implementation.
